5.2 Special hazards arising from the substance or mixture

Combustion releases carbon monoxide, carbon dioxide and smoke. Exposure to substances produced as a result of combustion or decomposition may be hazardous to health.
Formation of toxic gases is possible during heating or in case of fire.

5.3 Advice for firefighters

Use a self-contained breathing apparatus and a suit designed for firefighting.
Prevent heating of containers with water curtains.
Wear a self-contained breathing apparatus and chemical protective clothing.

Additional information

Do not inhale vapors and fumes.
Co-ordinate fire-fighting measures to the fire surroundings.
Move undamaged containers from immediate hazard area if it can be done safely.
Use caution when applying carbon dioxide in confined spaces. carbon dioxide can displace oxygen.
Use water spray jet to protect personnel and to cool endangered containers.
Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.
